NEUROCHEMICAL ANALYSIS OF THE CONSCIOUS BRAIN: VOLTAMMETRY AND PUSH-PULL PERFUSION[a]

Editors and Conference Organizers
ROBERT D. MYERS AND PETER J. KNOTT

CONTENTS

Preface. *By* ROBERT D. MYERS and PETER J. KNOTT xi

I. Methodological Overviews: Perfusion and Voltammetry
CHARLES A. MARSDEN and A. CHERAMY, *Chairs*

Honorary Plenary Lecture: History of *in Vivo* Analysis of Brain Functions Elicited from its Inner and Outer Surfaces. *By* W. FELDBERG 1

Development of Push-Pull Systems for Perfusion of Anatomically Distinct Regions of the Brain of the Awake Animal. *By* R. D. MYERS 21

Electrochemical Measurements in Brain Extracellular Fluid Space. *By* RALPH N. ADAMS 42

Electrochemistry *in Vivo*: Application to CNS Pharmacology. *By* ROSS F. LANE and CHARLES D. BLAHA 50

Single Unit Activity of Brain Monoamine-Containing Neurons in Freely Moving Animals. *By* BARRY L. JACOBS 70

General Discussion of Session I 78

II. Analysis *in Vivo* of the Brain's Catecholaminergic Systems
GREGORY E. MARTIN and R. N. ADAMS, *Chairs*

The Relative Roles of Neuronal Activity and Direct Presynaptic Mechanisms in Controlling the Release of Dopamine from the Cat Caudate Nucleus. *By* ANDRÉ CHERAMY, RANULFO ROMO, and JACQUES GOLWINSKI 80

[a]This volume is the result of a conference entitled Neurochemical Analysis of the Conscious Brain: Voltammetry and Push-Pull Perfusion, held by the New York Academy of Sciences on April 17-19, 1985 in New York City.

Voltammetric Detection of Dopamine Release in the Rat Corpus Striatum. *By* R. MARK WIGHTMAN, WERNER G. KUHR, and ANDREW G. EWING 92

Application of Intracerebral Dialysis and *in Vivo* Voltammetry to Pharmacological and Physiological Studies of Amine Neurotransmitters. *By* C. A. MARSDEN, K. F. MARTIN, C. ROUTLEDGE, M. P. BRAZELL, and N. T. MAIDMENT 106

Contribution to the Study of Nigrostriatal Dopaminergic Neuron Activity Using Electrochemical Detection of Dopamine Release in the Striatum of Freely Moving Animals. *By* ANDRÉ NIEOULLON, CLAUDE FORNI, and SOUMAYA EL GANOUNI 126

General Discussion of Session II 141

III. Interpretations of Catecholamine Activity in the Conscious Brain
KEN E. MOORE and URBAN UNGERSTEDT, *Chairs*

Analysis of Hypothalamic Transmitter Release during Cardiovascular Changes. *By* A. PHILIPPOU 145

Catecholamine Release within the Striatum of the Freely Moving Rat. *By* GREGORY E. MARTIN 151

Control of Dopamine Release by Dopamine Receptors and by Impulse Flow as Studied by *in Vivo* Voltammetry. *By* F. G. GONON 160

Interpretations of Voltammetry *in Vivo* Using Dialyzed Perfusion. *By* JOSEPH B. JUSTICE, JR. and DARRYL B. NEILL 170

The Trained Circling Rat and *in Vivo* Electrochemistry: A Behavioral Model and a Measurement Method to Study the Dynamic Role of Dopamine in Movement. *By* CURT R. FREED 188

In Vivo Release of Endogenous Dopamine from Rat Caudate Nucleus Induced by Amphetamine and Other Agents. *By* S. R. PHILIPS and A. M. ROBSON 200

General Discussion of Session III 213

IV. Serotonergic Mechanisms
PETER J. KNOTT and JAKOB KORF, *Chairs*

Electrochemical Detection *in Vivo*: Indoleamines or Uric Acid? *By* P. J. KNOTT, K. J. MUELLER, and J. G. YOUNG 215

Monitoring Dopamine Metabolism in the Brain of the Freely Moving Rat. *By* G. CURZON, P. H. HUTSON, G. A. KENNETT, M. MARCOU, and G. S. SARNA 224

Release of Serotonin in Structures Containing Serotoninergic Nerve Cell Bodies: Dorsalis Raphe Nucleus and Nodose Ganglia of the Cat. *By* FRANCIS HERY, MAXIME FAUDON, and CHRISTIAN FUERI 239

Serotonin Release in Rat Hippocampus Examined in *in Vivo* Voltammetry: Serotonergic Function and Tryptophan Availability. *By* MICHAEL H. JOSEPH and GUY A. KENNETT .. 256

Release and Metabolism of Dopamine and Serotonin in the Caudate Nucleus During Euthermia and Hibernation. *By* STEVEN K. SALZMAN, CARMEN LLADOS-ECKMAN, and ALEXANDER L. BECKMAN 267

The Use of *in Vivo* Voltammetry to Investigate Functional Recovery with Transplants and Neurotransmitter Interactions in the Rat Brain. *By* B. SCATTON, A. SERRANO, and A. DEGUEURCE 284

General Discussion of Session IV 302

V. Neurotransmitter Interactions: Amines
A. PHILIPPOU and ROSS F. LANE, *Chairs*

Drug-Induced Changes in the Efflux of Dopamine and Serotonin Metabolites from the Brains of Freely Moving Rats. *By* KENNETH E. MOORE 303

Monitoring 5HT Metabolism in the Brain of the Freely Moving Rat. *By* P. H. HUTSON, G. S. SARNA, B. J. SAHAKIAN, C. T. DOURISH, and G. CURZON 321

Microcomputer-Controlled Voltammetry in the Analysis of Transmitter Release in Rat Brain. *By* ROBERT D. O'NEILL and MARIANNE FILLENZ 337

Neurochemical Changes in Brain during Ongoing Behavior. *By* COSTAS C. LOULLIS and D. H. HELLHAMMER 349

Preferential Stimulation of Dopamine Release in the Nucleus Accumbens by Opiates, Alcohol, and Barbiturates: Studies with Transcerebral Dialysis in Freely Moving Rats. *By* GAETANO DI CHIARA and ASSUNTA IMPERATO 367

Synaptic Organization in the Oculomotor Nucleus. *By* H. DIX CHRISTENSEN, MICHAEL C. KOSS, and TSEGGAI GHEREZGHIHER 382

General Discussion of Session V 400

VI. Neurotransmitter Neuromodulator Interactions: Peptides and Amino Acids

ROBERT D. MYERS and COSTA C. LOULLIS, *Chairs*

Release of Proteins, Enzymes, and the Neuroactive Peptides, Enkephalins, from the Striatum of the Freely Moving Rat. *By* ALEJANDRO BAYÓN, BENITO ANTÓN, PHILIPPE LEFF, and SARA SOLANO 401

Release of Endogenous Amino Acids, Dopamine, and Cyclic AMP from the Rat Brain: Methodological Aspects and Mutual Interferences. *By* JAKOB KORF 418

Push-Pull Perfusion of the Hypothalamus and the Caudate Nucleus in Conscious, Unrestrained Animals. *By* V. D. RAMIREZ, J.-C. CHEN, E. NDUKA, W. LIN, and A. D. RAMIREZ 434

Sleep Factors Released from Brain of Unrestrained Cats: A Critical Appraisal. *By* RENÉ DRUCKER-COLÍN, RAÚL AGUILAR-ROBLERO, and GLORIA ARANKOWSKY-SANDOVAL 449

Amino Acid Profiles in Cortex of Conscious Rat: Recent Studies and Future Perspectives. *By* F. MORA, J. M. PEINADO, and R. D. MYERS 461

In Vivo Measurement of [^{3}H]GABA Release: An Approach to the Study of the Regulation of GABA-Containing Neurons in the Basal Ganglia and Associated Structures in the Cat and the Rat. *By* M. J. BESSON, M. L. KEMEL, C. GAUCHY, J. A. GIRAULT, U. SPAMPINATO, N. LANTIN, M. DESBAN, and J. GLOWINSKI 475

General Discussion of Session VI 489

Poster Papers

Serotonin Turnover in the Intact Rat Brain: Effects of Lithium. *By* A. I. BARKAI 490

Drug, Stress, and Circadian Influences on Dopaminergic Neuronal Function in the Rat Studied by Voltammetry and Chronoamperometry. *By* P. J. KNOTT, T. S. BRANNAN, C. D. ANDREWS, D. TOGASAKI, J. G. YOUNG, H. MAKER, and M. YAHR 493

Functional Interdependence between the Dopaminergic Neurons Innervating the Amygdala and the Nucleus Accumbens: *In Vivo* Voltammetry as a Tool for Functional Anatomy. *By* A. LOUILOT, M. LE MOAL, and H. SIMON 496

GABA Synthesized from Putrescine in Rat Brain and Its Enhanced Release by High K^+ in Caudate Nucleus. *By* TADASHI NOTO, TERUO NAKAJIMA, and R. D. MYERS 499

Hypothalamic Neuropeptide Release in Conscious Rats. *By* JON E. LEVINE 503

Delineation of Striatal Dopaminergic Autoreceptor Agonist Properties of (−)-Apomorphine with *in Vivo* Electrochemistry. *By* PATRICIA A. BRODERICK 506

Neurotensin Release of Endogenous Catecholamines from Hypothalamus of the Rat. *By* T. F. LEE and R. D. MYERS..... 509

Rapid Measurement of Dopamine Release using Brain Dialysis Combined with Microbore HPLC. *By* T. SHARP, A. CARLSSON, T. ZETTERSTRÖM, K. LUNDSTRÖM, and U. UNGERSTEDT..... 512

Effect of Morphine and Ethanol on Neuronal Release of Norepinephrine from the Hypothalamus: Relation to Body Temperature. *By* AMIR J. REZVANI, P. HUTTUNEN, and R. D. MYERS..... 516

Simultaneous HPLC and Evoked Potential Analysis of Cat Cuneate Nucleus. *By* WAYNE SIMPSON, GARTH E. RESCH, and M. D. GOLDFINGER 520

An Analysis of the Exchange-Diffusion Model for Norepinephrine Release Using *in Vivo* Voltammetry. *By* SHERREL HOWARD-BUTCHER, C. D. BLAHA, and R. F. LANE..... 524

A Developmental Study of Amphetamine-Induced Dopamine Release in Rats Using *in Vivo* Voltammetry. *By* RUSSELL A. GAZZARA and SHERREL HOWARD-BUTCHER..... 527

Chronic CNS Recording with *in Vivo* Electrochemistry in Rats: Monitoring Biogenic Amine Release in Behavioral and Pharmacological Models of Depression. *By* CARROLL W. HUGHES and HARDY J. POTTINGER 530

Decreased Striatal Levels of Ascorbic Acid in High Pressure Exposed Rats. *By* T. P. OBRENOVITCH and J. L. GILLARD..... 535

In Vivo Release of Catecholamines from the Rat Hypothalamus Measured by Intracerebral Dialysis. *By* CAROL ROUTLEDGE and C. A. MARSDEN..... 537

Effects of Acute and Chronic Atypical Neuroleptic Administration on Striatal and Accumbens Dopamine Metabolism Measured by *in Vivo* Voltammetry. *By* N. T. MAIDMENT and C. A. MARSDEN 539

Pharmacological Manipulation of the Serotoninergic Input to the Suprachiasmatic Nucleus—An Insight into the Control of Circadian Rhythms. *By* KEITH F. MARTIN and CHARLES A. MARSDEN 542

Correlations between Electrophysiological and Neurochemical Measures of Central Serotonergic Activity in Freely Moving Cats. *By* MICHAEL E. TRULSON 546

Neuropharmacokinetic Applications of *in Vivo* Monitoring Techniques. *By* P. H. HUTSON, G. S. SARNA, and G. CURZON 549

In Vivo Aminergic Activity of Locus Coeruleus and ACTH Release during Hemorrhage in the Cat. *By* K. V. THRIVIKRAMAN and D. S. GANN 553

In Vivo Voltammetry Versus Dialysis: Neurochemical Results. *By* JAMES A. CLEMENS and LEE A. PHEBUS 556

Index of Contributors 559

The New York Academy of Sciences believes that it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the authors of the papers that make up this *Annal* are their own and not those of the Academy. The Academy has no intent to influence legislation by providing such forums.
